## EmVista Essential Edition

EmVista is a voice communication control system – with a more than 15-year performance record – that uses state of the art VoIP technology and data-driven object oriented software design. EmVista Essential Edition is a COTS solution for emergency response environments with low call volume. An EmVista Essential installation interconnects up to 75 Emcom VoIP phones and is typically operated by a single attendant using an EmVista Master Station, but can support additional attendants in disparate locations using EmVista Satellite Stations. All audio through EmVista is recorded. EmVista Essential Edition also provides native video services with camera-equipped Emcom phones.
