

## BL1000 - VoIP, Hands-Free, Illuminated Intercom

The BL1000 is an ADA compliant, vandal-resistant, full-duplex, intelligent hands-free intercom that provides VoIP (Voice over Internet Protocol) communications utilizing SIP (Session Initiation Protocol). The durable Kydex housing and steel mounting plate make this intercom ideal for access entry points indoor and outdoors. An illuminated ring around the push button draws attention to the intercom in low light environments. The BL1000 is programmed via a web browser or is remotely supervised, tested and programmed using an Emcom Systems' EmVista Maintenance Station.
